CARLTON JAMES DIVERSIFIED ALPHA FUND

FUND OBJECTIVE

After the 2008 global economic downturn many companies, investors and even governments were not only left with huge deficits, but also left in a market place which was so drastically different to the previous years. The strategy adjustment required to facilitate such a change in market conditions was too much for many and the losses were significant. But this wasn't the first time this kind of adjustment was required, and it certainly won't be the last. Economic cycles of this nature have been regular since the turn of the 20th Century. The development of 24-hour news and age of connectivity has also meant that the word 'crisis' is used regularly. This reporting and this level of connectivity has the ability to effect such global uncertainty that it can mean an investor needs to change their strategy within days.

FUND DESIGN

The Diversified Alpha Fund is designed to manage this risk and diversify its structure over multiple asset classes, jurisdictions and market places to offer a truly diversified strategy that can follow the market and secure shareholders against market uncertainty.

The Carlton James Group have structured the Diversified Alpha Fund to utilise their existing strategies and experience. These strategies have seen the group's members overcome macro-economic issues beyond their control successfully over previous economic cycles.
